QuadView HDx/s
Firmware Version 1.04 Release Notes
26 January 2011

Installation Notes

Please follow the upgrade instructions in **Firmware Update Procedure** (13 January 2011) available under **Documentation** on the web.

It is highly recommended that system settings and preset data be exported and saved to a PC before proceeding with a firmware upgrade. Import saved settings after the firmware upgrade is complete. See commands **SETTINGSEXPORT** and **SETTINGSIMPORT** in the user's guide.

New Features

Changes to window positions resulting from preset commands, such as **WindowPresetLOAD**, executed via serial or telnet connection, or from attached devices like the BP-16, are now reflected in the Web Control Panel virtual screen.
