

XtendPoint™ Link

The right foundation. Unlimited possibilities.

XtendPoint Link is a compact desktop keyboard-and-mouse (KM) switch that lets an operator control up to four connected computers with a single keyboard and mouse. It is the entry-level building block of RGB Spectrum's **XtendPoint™** KVM ecosystem — a platform that scales to include networked, 4Kp60 KVM-over-IP matrix switching.

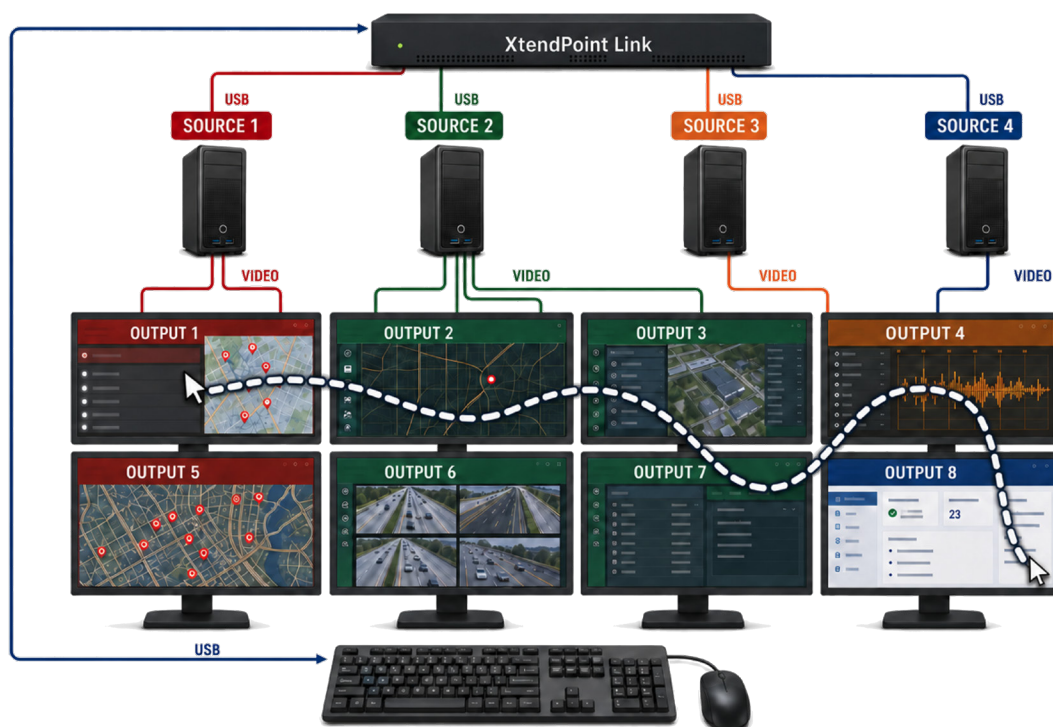

XtendPoint Link — a compact 4-system KM switch (44.7 × 399.3 × 169.9 mm)

A LOW-RISK ENTRY POINT

Solve keyboard-and-mouse sharing now and, if needed, build toward a complete KVM-over-IP solution over time. XtendPoint Link connects to as many as four local source computers with a single keyboard and mouse, using reliable USB switching for instant control.

HOW IT WORKS

Solve keyboard-and-mouse sharing now and build toward a complete KVM-over-IP solution over time.

WHY XTENDPOINT LINK

SIMPLIFY One control point One keyboard and mouse across up to four connected systems.	PRESERVE Protect your investment Keep today's equipment useful as your requirements expand.	PREPARE A path forward Create a deliberate route into the RGB Spectrum ecosystem.
